**The Idea of a University for 21st Century
Maulana Azad National Urdu University**

Looking at the present trend of the exigencies in several educational processes, at college and university levels, where the stress is primarily given on the applied aspects of knowledge, many scholars and educationists are pondering over the possibilities of alternative approaches to education, particularly at the tertiary level. Some of them are reflecting over the possibilities of holistic education.

There is a need to widen the vision of our perceptions. Against this theoretical background the MANUU should formulate its programme of Interdisciplinary Studies and Integrated Research, which envisages to organize, commission and participate across the disciplines in Urdu language and literature, comparative literature, social sciences, philosophy, comparative religions, linguistics, modern sciences and culture studies encompassing the social sciences and the humanities with the deepest concern for the relations between the scientific, cultural, corporate and political communities. This would be commensurate with the new realities of the 21st century.

An important and necessary function of MANUU, at this challenging moment in the changing world order, will be to become a centre which can help interpret Indian knowledge systems with intercultural exchange with other Western cultures, and for greater understanding of India's needs, pre-suppositions and aspirations. It will associate eminent scholars from within India and abroad with the execution of the collaborative research projects. While doing this we are assuming a proactive role of engaging in various educational, research and training activities in the service of society.

We thus envision the MANUU as a hub of scholarship and an agent of cross-cultural studies. We envision it to;

- a) promote collaborative interdisciplinary research projects,
- b) initiate cross-cultural dialogues through seminars and workshops, and joint research programmes,
- c) arrange to have scholars-in-residence for varying periods of time from various institutes/nations,
- d) deliberate on the implications of new technologies, economic and trade and management policies,
- e) promote courses in the language and literature of many nations, particularly of the European as well as Asian continent,
- f) provide ambiance and facilities for social and scholastic meeting with informed citizenry at large, and
- g) to take up contemporary concerns of institution building and practice and voluntary action. In sum, we envision the MANUU to be an independent scholastic centre of advanced studies in Urdu medium of instruction.

The University has a well established and efficient Examination Management System, a module of University ERP ‘Integrated University Management System’ (iUIMS), which has been developed in-house by CIT, MANUU. The system is very simple and generic and serves as an effective model that can be replicated by any educational Institution.

The iUIMS is configured as a private-cloud environment. It is backed by a centralized database, a digital depository of data for various activities of the University. The system is delivered as a desktop application within the enterprises wide network using ‘Application Virtualization Host’ as well as a Web Application hosted on local cloud server (<https://manucoe.in/>). Student Life Cycle Module along with the result processing modules covers all student related activities from Online Admission processing to result publication process and ends in printing of degrees. All services are available to

all stake holders of the University viz, students, teachers and administration at their finger tips. It renders services related to all phases of curricular and non curricular activities of students at the University.
