

Academic performance becomes a matter of great concern in our present system of education, because it occupies an important place in shaping the future of a student. There are numerous factors which predict the academic performance of a child. Among them, intelligence, socio-economic status, adjustment and study habits are of utmost significance. The present book focuses on how these factors predict the academic performance of the students. A sample of 594 secondary school students have been obtained from the Urdu and English medium schools and the best statistical techniques have been employed to analyze the data. The findings of this study are of immense importance to the policy makers, administrators, researchers, governmental and non-governmental organizations, managers, principals, teachers, parents and students. If collective and collaborative effort is being made from all sections of the society, no doubt we will be able to enhance the academic performance of the students and have a flourishing nation.

Predictors of Academic Performance

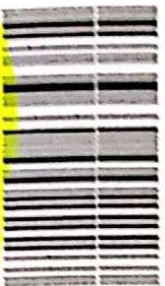

Muhammad Moshahid

Predictors of Academic Performance

Dr. Moshahid is an Associate Professor, Department of Education and Training, Maulana Azad National Urdu University, Hyderabad, India. He is a gold medalist, having more than 13 years of teaching experience, written two books, published more than 15 research papers, and presented more than 50 papers.

CONTENTS

	Page No.
List of Tables	9-11
List of Figures	12
Chapter I Introduction	13-63
Concept and Definition of the Terms	20-56
Significance of the Study	56-60
Objectives of the Study	60-61
Hypotheses	61-62
Delimitations	63
Chapter II Review of Related Literature	64-92
Chapter III Method and Procedure	93-108
Research Design	93-94
Population	94
Sample	95-98
Tools Employed	98-104
Collection of Data	104-105
Scoring of the Tests	105
Data Processing	105
Statistical Techniques	105-108
Chapter IV Analysis and Interpretation	109-174
Chapter V Discussion	175-183

Chapter VI Findings, Implications and Suggestions	184-192
Findings of the Study	184-188
Educational Implications	189-191
Suggestions for Further Research	191-192
Bibliography	193-212
