India is the third largest economy of the world in terms of purchasing power. Despite this improvement, more than 460 million people in India live in poverty. The reciprocity of poverty producing disability, and disability resulting in poverty has created new challengers for the implementation of inclusive education in India. The Constitution of India ensures equality, freedom, justice and dignity of all individuals and implicitly mandates an inclusive society for all including persons with disabilities. In the recent years, there has been a vast and positive change in the perception of the society towards persons with disabilities. It has been realized that a majority of persons with disabilities can lead a better quality of life if they have equal opportunities and effective access to rehabilitation
